Franke Evolution

The ultimate stage in coffee-making competence. When it comes to above-average performance the modestly sized Evolution is certainly among the elite. The entry-level model alone has everything you need. With its perfected technology there is virtually no task it cannot handle. In fact the Evolution is the darling of coffee aficionados and cool business minds alike. With its exclusive design this functional, compact machine is certainly an eye-catcher, and yet it's made to focus entirely on what's essential: producing an unmistakable coffee quality, which is why the Evolution has such a huge fan base throughout the industry: in restaurants, bars, hotels, large canteens and even the vending sector. In short, it's a coffee machine with character – and it excels in one particular area: The art of excellent coffee-making.

Operating panel

The focus is on easy operation. The large, clearly arranged product buttons are individually programmed and labelled. Whether in self-service operation with a maximum of 6 coffee products or in the operated version with up to 20 different coffee products: you're always in control.

Customer settings

The intelligent chip cards allow the user to set the key parameters himself in a matter of seconds, i.e. the amount of coffee to be ground and the amount of water and to correct any setting errors – without having to call out customer service. After installation the optimum setting values are stored on a chip card, from where they can be downloaded at any time.

Cleaning/hygiene

The integrated automatic rinsing and cleaning programme for the coffee and milk unit greatly facilitates the maintenance and care of the coffee machine, and ensures optimum hygiene and a consistently high coffee quality.

Dispenser area/operating area

Variable and sturdy. With the height of the coffee/milk dispenser adjusted steplessly from 80 to 150 mm, you can use all the popular sizes of cups and containers without problem. The optimised coffee supply system and the combined dispenser guarantee that the coffee is always at the ideal temperature and that cups are filled evenly when using the double-dispenser system. The dispenser is extremely easy to dismantle and can be cleaned in a dishwasher without any problem.
