## Arctic Star 55 Bottle fed

The exterior of the Arctic Star 55 bottled water cooler has a high quality black and silver finish combined with a blue splash back and drip tray. Beneath the stylish exterior sits an evolution of proven components and new hygiene technologies. The Arctic Star 55 features SIP technology, a special device that eliminates bacteria to keep the water pure, it converts oxygen into ozone and pumps tiny bubbles of ozone into the cooler tank and pathways, an entirely natural way to purify your drinking water. The very small amount of ozone used in SIP is totally harmless to humans, but not to bacteria. It is environmentally friendly technology too as its 80% more energy efficient than using Ultra Violet sanitisation. The dispenser also features Hygiene Guard to inhibit bacterial growth. The hot and cold model can deliver up to 1.5 litres of hot water at up to 95C. Using a light sensor the hot and cold model features a sleep mode that can turn its boiler off during darkness, saving up to 25% in energy costs. The Arctic Star 55 is available as a floor standing model or a compact table top version.

- Attractive high quality finish
- Built-in cup dispenser
- Easy to use push buttons
- SIP technology eliminates bacteria
- Energy save mode on hot and cold models
- Floor standing footprint:  
1135mm (h) x 340mm (w) x 340mm (d)
- Table top footprint:  
460mm (h) x 340mm (w) x 340mm (d)
- Floor standing Weight 18Kg
- Table top Weight 15Kg
