## Bev Max Media 2

The highly-engineered and reliable BevMAX MEDIA2 has the best-in-class product selection and capacity. Experience the difference with the platform called MEDIA2. The large 9 inch HD media screen boots up in less than a minute, and allows you to purchase multiple items at the same time using a shopping cart feature. If you have special dietary requirements or need to be alerted to allergens present in ingredients the media screen displays nutritional and allergen information before you purchase. The media screen can display images and videos to promote brands or inform consumers of healthier product choices. It's now even easier to integrate modern payment methods using optional MDB compatible systems, these allow customers to purchase using cash, notes, contactless debit cards or mobile phones. With two model sizes, the narrow 35 selection or the larger 45 selection, it's ideal for any business looking to provide a cold drinks service. Help consumers make selections while exposing them to new products, slow movers, or complimentary products. Manage machines over the air with Simple CONNECT PUS for price changes, planograms and nutritional information.
